DETAILED ACTION

Response to Amendment

The examiner is in receipt of applicant's reply to office action mailed 5/9/2006, which was received 6/12/2006. Acknowledgement is made to the amendment to claims 31,35-37 and the addition of new claims 38-45. The applicant's amendment and remarks have been carefully considered, but were not found to be persuasive, therefore the previous rejection modified as necessitated by amendment follows:

Examiner's Note

Examiner has cited particular columns and line numbers or figures in the references as applied to the claims below for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 31 and 35-45 rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson et al (US PG Pub 2004/0039750) in view of Official Notice.

In regards to claims 31 and 35-37, Anderson discloses all the features of the instant claims. For instance, Anderson teaches "the present invention relates to a computer publication and provides a computer publication in the form of a virtual book, magazine or catalogue. The publication appears on the computer screen with the "look and feel" of a real-life publication. The publication has pages which can be turned (appearing as an animation on the computer screen) and the publication can be manipulated with the appearance of being manipulated in three dimensions" (see abstract and all FIGURES). Anderson further teaches links to purchase products (para 106) and the use of a pull down menu to easily navigate to desired products (para 26).

Applicant may argue that the links and categories are not presented at the same time as the content and the editorial content. The examiner takes official notice that it was well within the skill at the time of the invention to combine any number of useful links and category listings within the pages that are currently being viewed by the user. It would have been obvious to a person having ordinary skill in the art at the time of the invention to include in Anderson placing the shopping links and categories in view with the other content presented to the user, because it has been well established that placing sales information in plane view of a purchaser increases the likelihood that a purchase will be made (refer to advertisements) thus increasing revenue of the provider.

Response to Arguments

Applicant's arguments filed 6/12/2006 have been fully considered but they are not persuasive. Applicant argues that Anderson does not suggest a shopping table of contents. The examiner disagrees and refers the applicant to the discussion above.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Mark Fadok** whose telephone number is **571.272.6755**. The examiner can normally be reached Monday thru Friday 8:00 AM to 5:00 PM.
